## RIGHT FOR YOU

How can a company like Payne know what's right for you? The answer is experience. D.W. Payne and sons started making the right products for their west coast customers back in 1914. Since that time, we've grown nationwide with a brand that provides products that are attractive and affordable. These same principles apply to our family of air conditioners, indoor coils and thermostats. Because this solid lineup of cooling equipment carries the Payne name, you can be sure it's the right product at the right price, right for you.

# Cool Comfort

Comfort is important to all of us. There's nothing quite like the cold blast of an air conditioned home on a scorching summer day. At the same time, nobody wants to go broke cooling their home. That's why Payne offers a family of central air conditioners that's right for you.

The most popular unit in our lineup is the PA10. One of the great things about this air conditioner is the way it looks. And, beneath that polished, scratch-resistant surface is a smooth-running, energy-saving cooling machine.

No matter what your favorite indoor activities may be, you can carry on undisturbed because the PA10 operates so quietly. At the same time, this economical unit conserves electricity at a commendable 10 SEER (Seasonal Energy Efficiency Ratio — the higher the SEER, the better the efficiency). And, you can expect the savings to continue for years because Payne products are designed, built and tested for long lasting operation.

# Model PA10

## COMPACT SIZE

The compact size of the PA10 helps it blend into your landscape. We are able to make this unit smaller without sacrificing performance because of its efficient heat transfer capability.

## LONG-LASTING FAN MOTOR

Our high-efficiency fan motor contributes to the performance of the PA10 by braving the summer's heat for years of durable operation.

## NEIGHBOR-FRIENDLY DESIGN

Your neighbors will appreciate the quiet operation, thanks in part to our specially designed fan blades. Our exclusive design improves economy and reduces noise associated with turbulent air movement.

## BUILT-TO-LAST COMPRESSOR

You can count on years of cooling comfort because the most important component of the entire unit, the compressor, operates quietly and reliably with built-in protective features.

## ATTRACTIVE FINISH

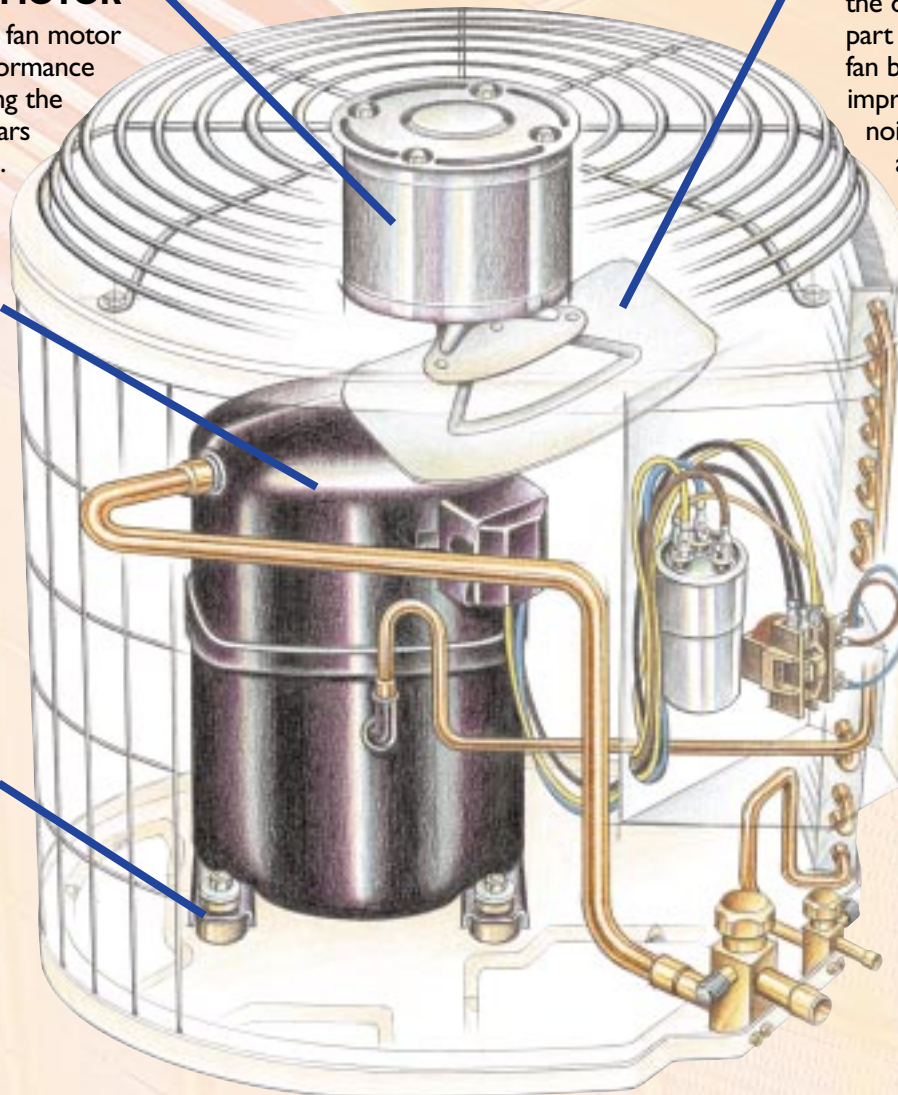

The PA10 looks good today, and will continue to look good for years. The corrosion-resistant finish resists scratches, rust and corrosion, the result of our galvanized steel cabinet and powder coat paint.

## SMOOTH, QUIET OPERATION

Rubberized isolation pads create a buffer between the base pan and the compressor to minimize noise from vibrations.

## LOW MAINTENANCE

Cleaning or changing the indoor filter regularly will greatly reduce the need for required maintenance of the system.

# For Higher **Efficiency**

As an ENERGY STAR® Partner, PAYNE Heating & Cooling has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

**Model PA12** This is as good as it gets. The PA12 delivers a whopping 12 SEER, or about 15% greater efficiency than a standard 10 SEER unit. In other words, you pay more now, but you save more down the road. Much of the efficiency of this model can be attributed to the compressor. The compressor is the heart of your cooling system. So, naturally, when you have an efficient, quiet and reliable compressor, you end up with a very desirable air conditioner. In keeping with our family theme, the PA12 offers the same no-nonsense approach to cooling technology as our PA10.

## OUR WARRANTY

Both models are covered with a five-year limited warranty on the compressor and a one-year limited warranty on the entire unit. Payne also offers additional optional warranty programs.

# Easy-To-Use

## **Comfort** with **Payne Thermostats**

### **Programmable Thermostat**

Perfect for the homeowner on the go, Payne's programmable thermostat lets you set indoor temperatures according to your schedule. You can come and go as you please, letting your thermostat worry about system operation. Indoor temperatures will be automatically adjusted to the settings you selected for optimum comfort and efficiency.

### **Thermostat**

This attractive and reliable thermostat is designed to perfectly complement your new Payne central air conditioning system. Its easy-to-read display makes operation a breeze.

## Let Payne Complete Your Comfort.

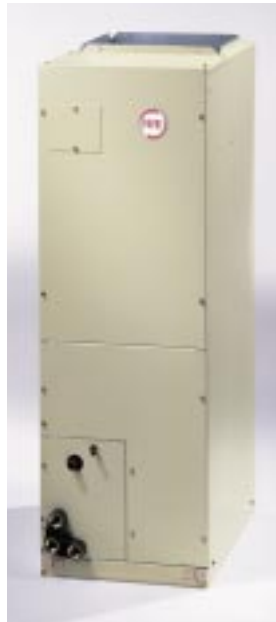

Payne always recommends replacing the indoor coil when purchasing a new air conditioner. Most likely, the indoor coil is as old as the air conditioner you are replacing. If that's the case, your old coil will not be as efficient as a new one. Or, the older coil could possibly contain dirt or other contaminants that would be harmful to the new unit. Buying a new coil also means your entire system will be covered with new product warranties.

**Central Air Conditioner and Evaporator Coil System**

# Enhanced Air Conditioning Performance with **Payne Indoor Coils.**

An air conditioning system consists of more than the unit that sits out in your flower bed. It includes an indoor section that is vital to cooling performance. Your Payne dealer will determine which of these coils will best match the air conditioner you have selected.

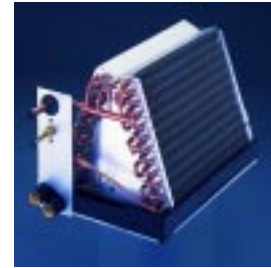

**Fan Coil**

## Indoor Evaporator Coils

**Cased Coil**

**Uncased Coil**

**Cased Horizontal Coil**

**Cased Slab Coil**

## Payne Is The Right Choice

If you've talked to your dealer and read this brochure, you've probably learned why Payne is the right choice. It's the right product at the right price, available right now offering dependable, comfortable cooling summer after summer. So make the decision easy on yourself — choose Payne. When you do, you're choosing a long-standing history of indoor comfort products that are just right for people just like you.
